Smash My Trash services take mobile waste compaction to the next level with our innovative Smash Trucks®. Our unique approach to compacting your commercial waste provides space you may not have realized is available.

Compare these to our monthly mobile waste compaction service. We monitor your waste, and our Smash Truck arrives at your location as frequently as needed. We shred the waste using a revolving drum that glides back and forth over your trash. This compacts the material by eliminating the air pockets, which allows you to add much more material to the dumpster before it needs to be hauled. We even notify you when it is time to call your hauler. We do all this without impacting your employees or your business operations.

Benefits of Dumpster Compaction with Smash My Trash

What sets the Smash My Trash message apart from the competition is the dedication to details. Our purpose is to add value to businesses. If that isn't happening, we will work with our customers individually to improve the situation. The last thing we want is to be just another cost to worry about.

Mobile waste compaction trucks aren't all built equal. The difference in Smash Truck's quality compared to competitors is significant. Some of the best features include:

- Low-emission trucks that are clean-idle certified
- Utilizes the natural weight of the drum, no dangerous hydraulic pressure involved in compaction
- Drum safety guards to ensure dumpsters are protected ZERO TOUCH driver policy protects bins from any sort of contact
- German and North American manufacturing and parts
- Multiple livestream cameras to record all operations

Your safety and satisfaction are second to none. Our Smash Trucks have numerous safety features built into them, which protect dumpsters from damage. Our expert operators are the very best in the business, maintaining our comprehensive ZERO-TOUCH policy for all containers.
